

Promotion of a new Springer book - "*Karst Aquifers - Characterization and Engineering*"

On 11 May, 2015. promotion of the newly published Springer book "*Karst Aquifers - Characterization and Engineering*" took place in the Ceremony Hall of Rectorate of University of Belgrade. The book is edited by Zoran Stevanović, the Head of the Centre for Karst Hydrogeology of University of Belgrade (CKH). In total, 22 authors from 11 countries, experts in Karst hydrogeology provided their contributions, among them four from the CKH. The book consists of 692 pages divided in 17 chapters. This practical training guidebook presents supporting material for academic courses worldwide that include this and similar topics. It is also a sourcebook for students and other attendees of the International Karst School: *Characterization and Engineering of Karst Aquifers*, which opened in Trebinje, Bosnia & Herzegovina in 2014 and which will be organized every year in early summer.

The book was presented by Academician Vidojko Jović, prof. Ivanka Popović, Vice-Rector of the Belgrade University responsible for the Science matters, Prof. Emeritus Ognjen Bonacci from University of Split, Croatia, Prof. Ivan Obradović, Dean of the Faculty of Mining & Geology and Editor Prof. Zoran Stevanović.

After the promotion group of MS students from the Faculty of Mining & Geology of University of Belgrade visited the monument in front of the Rectorate building and paid tribute to Jovan Cvijic.
