

Visit of Heidelberg Waterworks, May 2017

Zoran Stevanović and Saša Milanović have visited the premises and facilities of the Waterworks of Heidelberg, Germany (Stadtwerke Heidelberg Netze GmbH), on 16 and 17 May, 2017. Our host was Mme Haike Hartmann-Mühle, the Chief of the Laboratory for Water Hygiene and Quality. This visit was an opportunity to learn about organisation of this renowned Water utility company, water sources and well-field, which supply the city with potable groundwater and system of water control and treatment. Three MS students in hydrogeology from University of Tübingen including Miloš Rakijaš who was under-graduated at our School, have also joined us during this visit.

The Heidelberg waterworks representatives also took this opportunity to donate some laboratory equipment which will facilitate CKH further field and laboratory works. We highly appreciate this support.

CKH members and students from Tübingen with Mme Haike Hartmann-Mühle
